Education

Dr. D.Y. Patil Institute of Technology, Pimpri

2023 – 2026

B.E. in Computer Engineering | CGPA: **9.67** | Pune, Maharashtra

Guru Gobind Singh Polytechnic, Nashik

2020 – 2023

Diploma in Computer Engineering | **89.94%** | Nashik, Maharashtra

Experience

Trainee Engineer | Capgemini

Jan 2025 – Apr 2025

Java, Spring Boot, Spring MVC, Spring REST, Spring Data JPA, Spring Security, Hibernate, JDBC, PostgreSQL, MySQL, JUnit, Mockito, SonarQube, Docker

- Completed intensive hands-on training in **Java Full Stack** development covering **Spring Boot, Spring MVC, Spring REST, Spring Data JPA, Spring Security, Hibernate ORM**, and **JDBC**.
- Worked with **PostgreSQL** and **MySQL** including schema design, query optimization, and indexing strategies for high-performance data access.
- Applied software quality practices using **JUnit** and **Mockito** for unit and integration testing, **SonarQube** for code quality analysis, and **Docker** for containerization.
- Built a **Classical Business Management System** as capstone project, applying full stack architecture principles end-to-end in a team environment.
- Completed **4 months of training with zero holidays**, demonstrating exceptional commitment and discipline.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Java, PHP, C++, Python (basic)

Frontend: React.js, Next.js, React Native (familiar), HTML5, CSS3, TailwindCSS, shadcn/ui

Backend: Node.js, Express.js, RESTful APIs, Microservices Architecture, Prisma ORM, Drizzle ORM, Webhooks

Java / Spring: Spring Boot, Spring MVC, Spring REST, Spring Data JPA, Spring Security, Hibernate ORM, JDBC, Maven

Databases: PostgreSQL, MySQL, MongoDB, Supabase (RLS, Auth, Storage), Query Optimization, Indexing

Testing & Quality: JUnit, Mockito, SonarQube

AI / ML: LLMs, RAG (Retrieval-Augmented Generation), Agentic AI, LangChain, Prompt Engineering

Cloud & DevOps: AWS (EC2, S3), Vercel, Docker, CI/CD (GitHub Actions), Serverless Functions

System Design: Scalable Architecture, Caching, Load Balancing, API Rate Limiting, Event-Driven Architecture, High-Concurrency Systems

Tools: Git, GitHub, Postman, IntelliJ IDEA, VS Code, Figma, GitHub Copilot

Projects

Hynts.in | GitHub | Demo

Next.js, React.js, Supabase, TypeScript, TailwindCSS, Node.js, Google Analytics

- Developed and launched a full-stack platform for students to explore **off-campus job openings**, **real interview experiences**, and **preparation resources**, scaling to **5,500+ active users** and **40K+ page visits**.
- Engineered a **React + Next.js** frontend with **server-side rendering**, **infinite scrolling**, **debounced search**, and **pagination** for seamless UX at scale.
- Designed a **Supabase-backed RESTful architecture** with **database indexing** and **query optimization**, enabling fast response times under high concurrent traffic. Integrated **Google Analytics** to track **60K+ events**.

Slide | GitHub

Next.js, React.js, Node.js, Prisma ORM, PostgreSQL, Instagram Graph API, Webhooks (Ongoing)

- Building a **SaaS Instagram automation platform** enabling creators and businesses to automate **personalized DM replies** triggered by comment keywords — targeting creator economy at scale.
- Architected a **microservices-oriented backend** using **Node.js** and **Webhooks** with **Instagram Graph API** for real-time event processing and audience engagement.
- Building a **dashboard** with analytics, message tracking, and **subscription management**, with **optimized DB queries** and indexing for performance.

Opinion | GitHub | Demo

Next.js, React.js, Supabase, TailwindCSS, shadcn/ui

- Built an anonymous **college feedback platform** handling **2.1K visits** and **8.6K+ API requests** within **2 days** of launch — demonstrating ability to architect for high-traffic spikes.
- Implemented a **lightweight, scalable Node.js + Supabase backend** with real-time updates and persistent data storage, requiring zero authentication overhead.

Krishna Speaks | GitHub | Demo

React.js, TypeScript, TailwindCSS, Topmate API, Google Analytics

- Designed and shipped a **performance-optimized React frontend** for an eBook-selling platform, growing organic traffic to **1.8K+ visitors** and driving **207+ sales**.
- Integrated **Topmate API** for **secure payment processing** and automated **eBook delivery via WhatsApp and email**.

Certifications & Achievements

- **BNP Paribas Hackathon Finalist (Mumbai):** Built a real-time money laundering detection system using pattern recognition and live data analysis — selected as a finalist from national pool of participants.
- **Second-Year PBL Winner:** Won college-level Project-Based Learning Hackathon for an innovative technical project.
- **Research Paper Published:** *IoT-Based Moisture Removing System for Agricultural Crops* — published in IJARST Journal.
- **DSA:** Solved **450+ problems** across platforms demonstrating strong problem-solving and algorithmic thinking.
